SUGGESTED CONTACTS FOR SHARED TIME & COMMERCIAL KITCHEN FACILITIES

A **commercial kitchen** is a facility that is licensed or permitted by the Environmental Health Department or the Georgia Department of Agriculture. Food Service operations using the commercial kitchen will be regulated by the local Environmental Health Department (this would include catering operations) while food sales operations are regulated by the Georgia Department of Agriculture. The companies that produce food products in the commercial kitchen that fall under the Georgia Department of Agriculture's jurisdiction are each licensed separately.

This list of **shared time or community kitchens** has been compiled from information provided by inspectors of the Georgia Department of Agriculture Consumer Protection Division. Facilities regulated by the Georgia Department of Agriculture are required to have a **Food Sales Establishment License**. If the individual is producing food to be sold to a company for further sale (wholesale) they will contact the Food Processing Manager, Natalie Adan, at (404) 657-4801 or Natalie.Adan@agr.georgia.gov. If the individual is producing food to be packaged and sold to the end consumer they will need to contact the District office for the area of the processing plant. The list of District office locations and contact numbers may be found on the Georgia Department of Agriculture website at www.agr.georgia.gov; click on Divisions, then click on Consumer Protection Division, finally click on District Offices.
